Full Stack Developer – Job Description

Afford Medical is a leader in the medical devices sector in India with a presence in other emerging markets as well. We are in the process of revolutionizing this sector with digital products and are looking for a Full Stack Developer who is eager to make an impact. This is an opportunity to work in an early-stage start-up environment yet in the safe environment of a 2 decades old company. Recruits will play a vital role in not only shaping the future of new platforms and products but also an opportunity to learn and grow in a fast-paced ecosystem.

Responsibilities

- Build highly-reliable and scalable products in full-stack Go Lang leveraging its features and flexibility
- Build backend platform components to function with high throughput and low latency.
- Work in a fast-paced, collaborative environment ensuring deliverables in a timely manner
- Posses a strong passion to make an impact as a programmer and an eagerness to learn and work on new tech stacks

Required Skills

- Experience in building and scaling resilient backend services
- Prior hands-on experience on building scalable web applications on GoLang/MERN stack (MongoDB, ExpressJS, ReactJS, NodeJS)
- Experience in Agile methodology
- Experience in version control like GitHub, Gitlab
- Proficiency in Dockerization, CI/CD(Jenkins)
- AWS/GCP/MS Azure
- SQL/NoSQL databases
- Experience in designing RESTful, scalable, highly responsive APIs
- Experience in testing frameworks
- Experience in Caching

Preferred Skills

- Prior experience working in the **E-Commerce** or allied domains
- Possess design sensibilities to develop UI/UX interfaces
- Strong understanding of Microservices architectures
